Portfolio: <https://angeleefshaw.github.io/fullstack-portfolio/> · Github: <https://github.com/angeleefshaw>

## EXECUTIVE SUMMARY

---

Passionate and solutions-based full-stack developer with an analytical approach to development and the ability to solve problems quickly. Well adapted to both an independent and a collaborative environment. An avid learner and detail-oriented self-starter with superior communication skills and leadership qualities.

## WORK EXPERIENCE

---

### CMHWorks, Purcellville, VA

March 2021 - Present

Full Stack Software Developer

- Helped to troubleshoot, debug and upgrade data-intensive reporting software on the .NetCore platform by providing a thorough analysis of bugs and offering solutions within an estimated time frame.
- Worked in an Agile and Scrum environment to build and plan projects across the development life cycle.
- Provided peer review of code via GitHub to ensure software is performant, any existing conflicts are resolved, and code quality is consistent across the code base.
- Regularly used Typescript to write, debug, and refactor code in an effort to prepare the code base for future development using static typing..
- Used object oriented programming, C#, Typescript, and AWS Lambda (designed to only run when needed) in the development of a CSV download feature. This feature allows users to download all reporting data stored in the database.
- Participated in a complete refactor of Highcharts reports by breaking report features and functionality into modularized Angular components and applying dynamic filtering logic for large sets of data.

### Search Peak Inc, Charlotte, NC

March 2020 - March 2021

Front End Developer

- Assisted in the creation of server-side static rendering of Javascript websites for search engine crawling best practices.
- Implemented custom frontend design of web projects on Wordpress sites through theme installation, customized site files, and API integration in PHP.
- Used Wordpress theme editor to design and construct pages and posts for multiple sites using HTML.
- Collected relevant data such as images and content needed for site build.

## CERTIFICATIONS AND LICENSES

---
